Best Practice BIM for Infrastructure

Paul King, Bentley Systems

Role of the owner

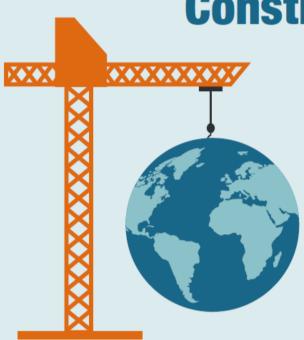

Defining better business outcomes from projects

Delivering the project

Reducing risk and cost and improving safety

Supporting the supply chain

Helping teams to better meet the owner's required outcomes

Construction matters for the world economy ... but has a long record of poor productivity

Construction-related spending accounts for

13% of the world's GDP

...but the sector's annual productivity growth has only increased

1% over the past **20 years**

\$1.6 trillion of additional value added could be created through higher productivity,

meeting half the world's infrastructure need

McKinsey & Company, 2017

- Reshape regulation
- Rewire contracts
- Rethink design
 - Improve procurement and supply chain
 - Improve onsite execution

Infuse technology and innovation

Reskill workers

REINVENTING CONSTRUCTION: A ROUTE TO HIGHER PRODUCTIVITY

FEBRUARY 2017

IN COLLABORATION WITH MCKINSEY'S CAPITAL PROJECTS & INFRASTRUCTURE PRACTICE

Bentleu[®]

| External forces | | Regulation | Enable | er | | Productivity improvement | | | | Cost saving |
|------------------------|---|---|--------|-------------|----------|-----------------------------|---|------|-------|-----------------------------|
| | | Collaboration and contracting | | 8-9 % | | | | | | 6-7 % |
| Industry dynamics | | Design and engineering | | | 8-10 | % | | | | 7-10 % |
| | | Procurement and supply-chain management | | | | 7-8 % | | | | 3-5 % |
| Firm-level | | On-site execution | | | | 6-10 % | % | | | 4-5 % |
| operational factors | | Technology — | | | | | | 14-1 | 5 % | 4-6 % |
| | | Capability building | 8-10 % | | | ration and | | | 5-7 % | 3-5 % |

Lower costs

33% reduction in the initial cost of construction and the whole life cost of built assets

Faster delivery

50%

reduction in the overall time, from inception to completion, for newbuild and refurbished assets

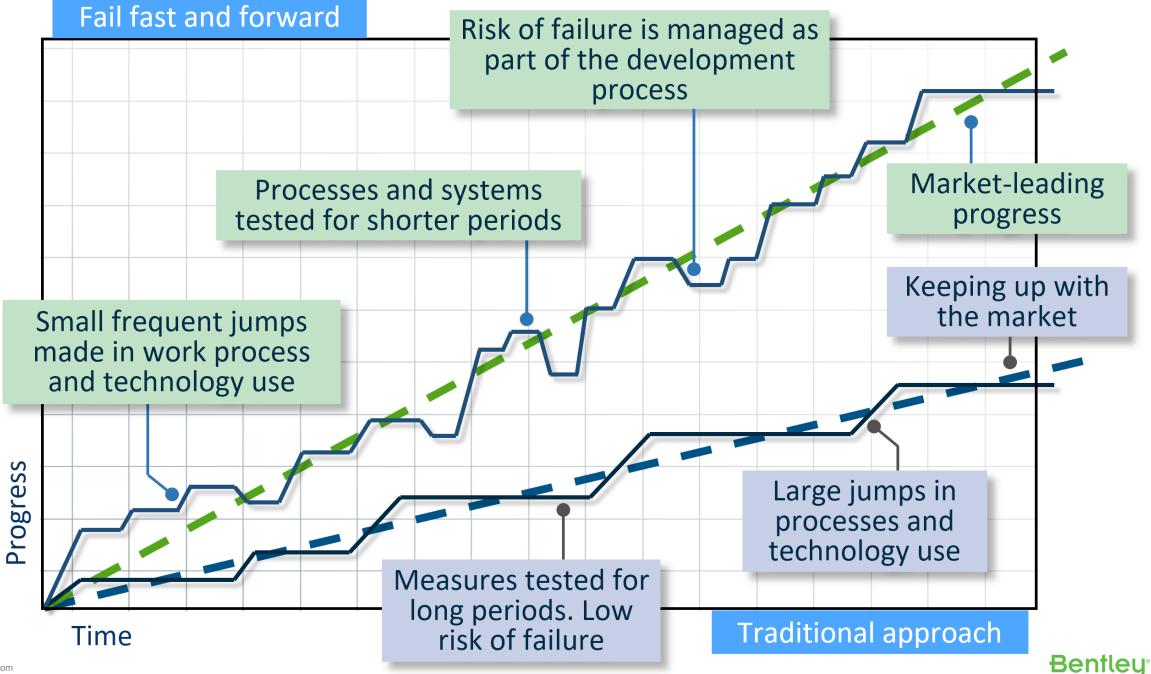

Lower emissions

50% reduction in greenhouse gas emissions in the built environment

Bentley

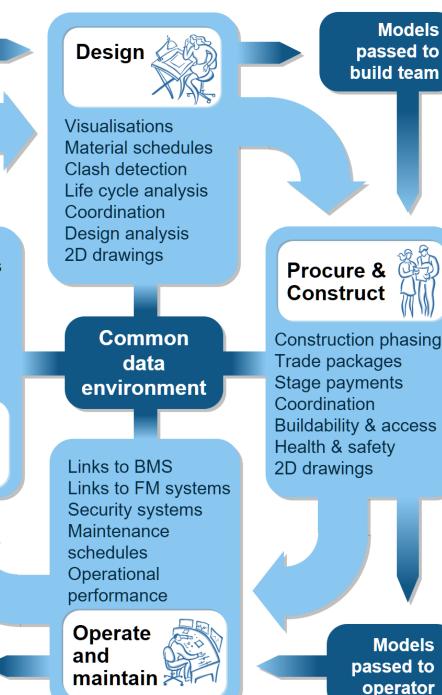

Safe demolition Sustainability audits Knowledge management Hazardous material tracking Building cloning

Continued use of the model

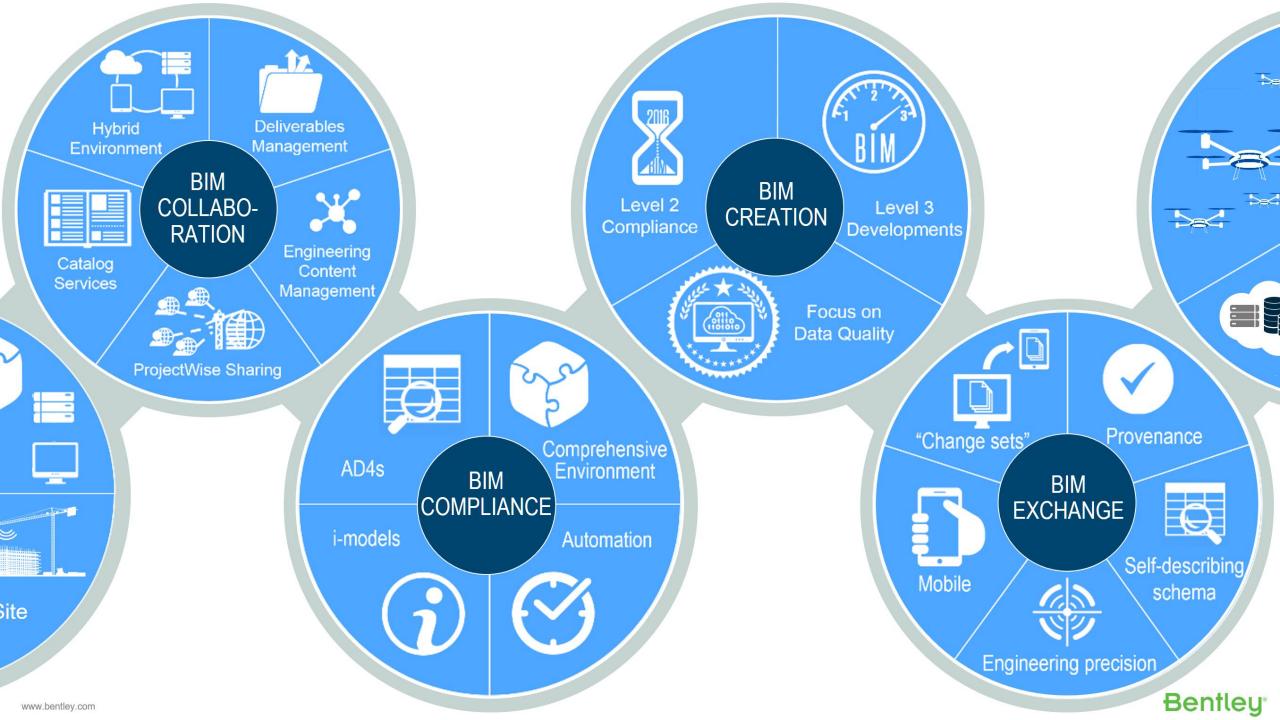

Models used by others as appropriate

Process of generating & managing asset data over its life cycle using model-based technologies linked to a database of reliable information

Bentleu[®]

Role of the owner

Defining better business outcomes from projects

To create an integrated design, facilitating multidisciplinary collaboration through the life of the project, becoming the base for an asset management system

Government as a client can derive significant improvements in cost, value and carbon performance through the use of open sharable asset information

- Improve cost and time certainty protect public money
- Improve understanding of risks
- Maintain quality and environmental standards
- Increase the efficiency within the delivery supply chain
- Have transparent and controlled change management
- Minimise impact on members of the public

Don't just mandate BIM

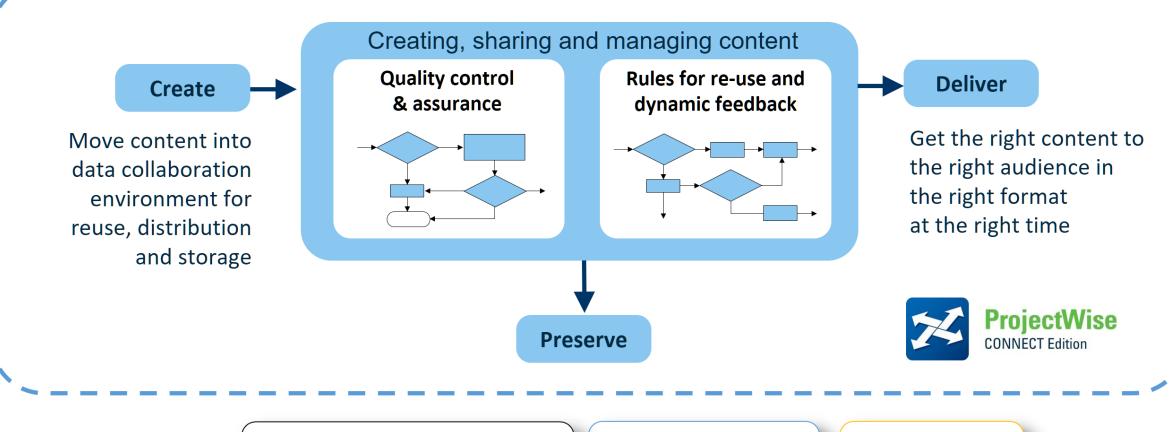

Define requirements

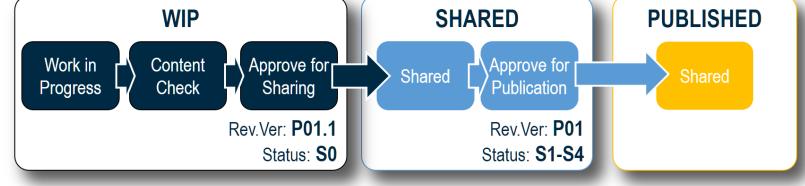

- Methodology and outcomes
- Common data environment
- Start with the end in mind

Enforce

Common Data Environment (CDE)

| DRAFT INTERN | ATIONAL STANDARD |
|-------------------------------------|---|
| | ISO/DIS 19650-1 |
| | |
| ISO/TC 59 /SC 13 | Secretariat: SN |
| Voting begins on: 2017-02-17 | Voting terminates on: 2017-05-11 |

Organization of information about construction works — Information management using building information modelling —

Part 1: Concepts and principles

Part 2: **Delivery phase of assets**

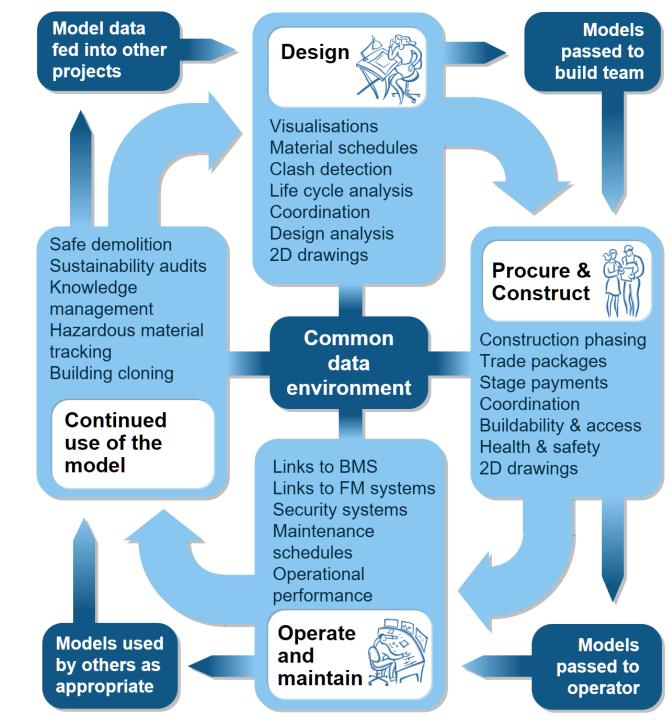

If the owner has to cleanse as-built data once operational it costs 8X more than collecting it during project handover

Delivering the project Reducing risk and cost and improving safety

- Define what's needed
- Develop a plan to deliver it
- Ensure everyone is capable of delivering
- Produce the deliverables
- Manage the documents and data

Bentley[®]

• Ensure compliance

Multi-discipline

Optimise rail track

layout and design

rail network

design

GIS

Map, manage, analyse, view and interpret the infrastructure around you, regardless of your industry

Corridor mapping & analysis Terrain modelling,

corridor mapping and analysis for linear assets

Drainage design & analysis

For networks ranging from civil drainage to complex land development studies

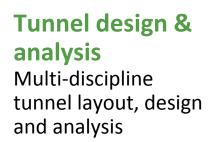

Bridge design & analysis

Multi-disciplinary bridge layout, design and analysis

Station & platform design & analysis Integrate platform and station design into rail network infrastructure

ALIM Manage asset information and related documents through the

lifecycle

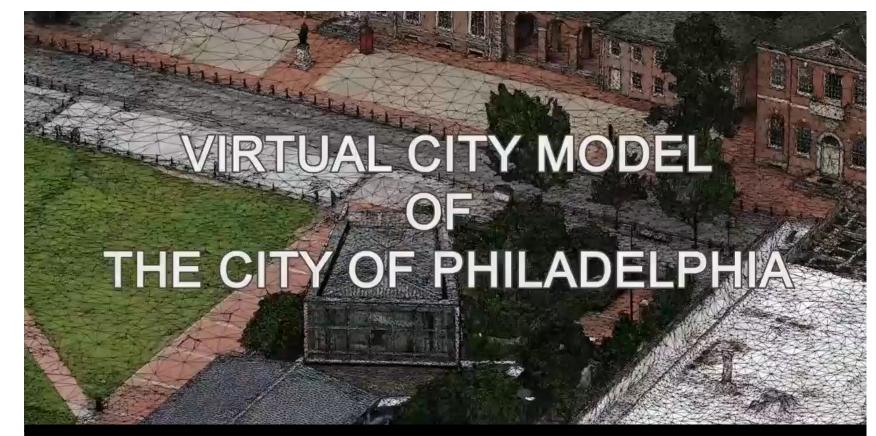

Transportation inspection Infrastructure inspection across the asset lifecycle

Predictive maintenance Decision support for railway maintenance

Reality modelling with ContextCapture

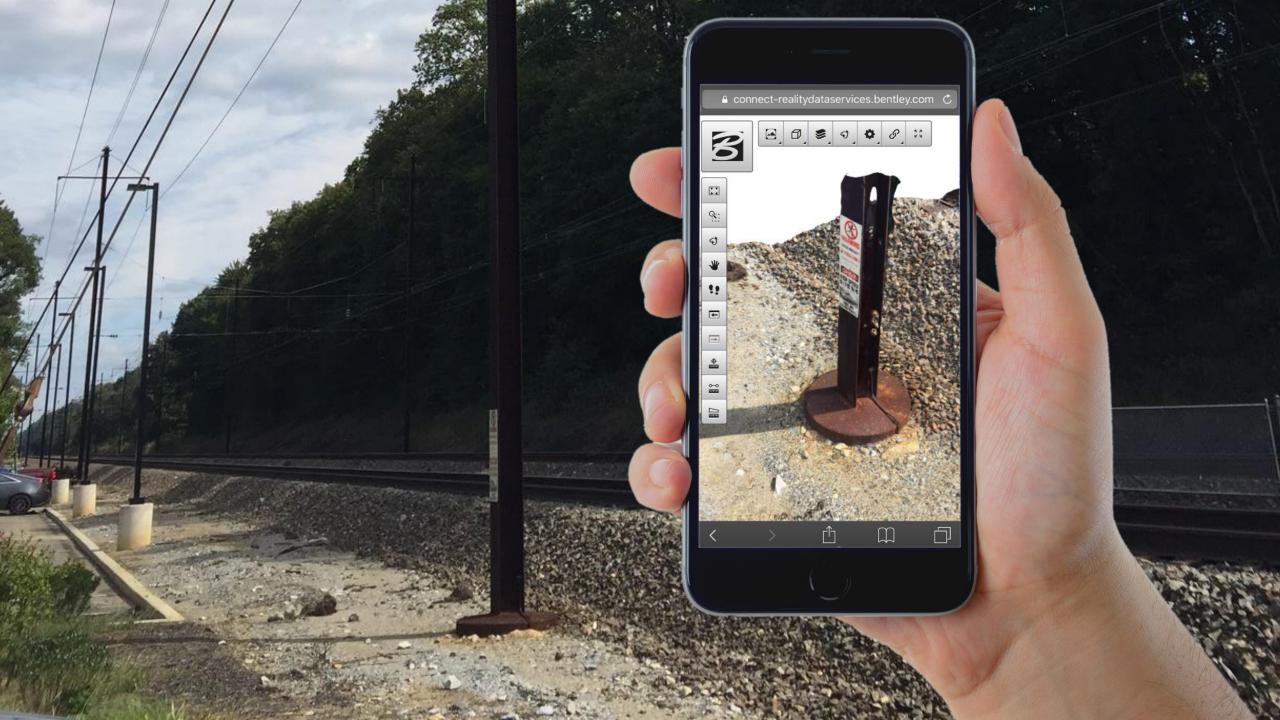

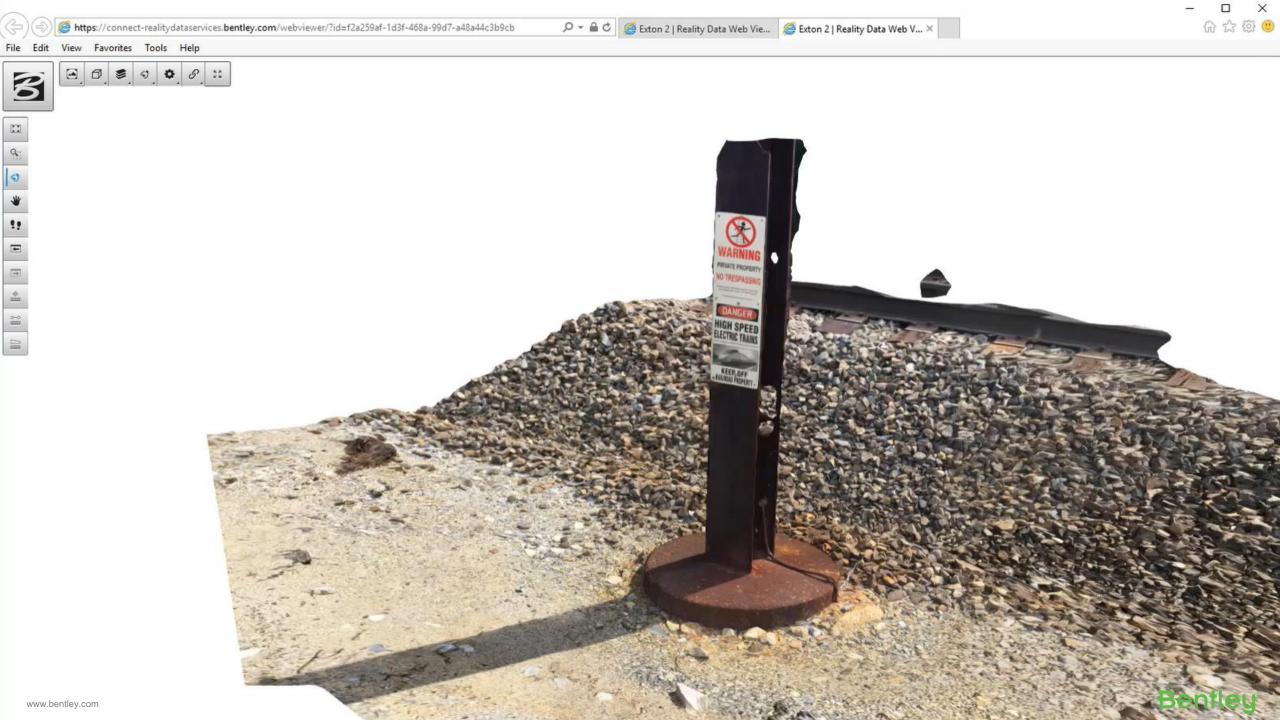

Accurate, geo-located Reality Mesh created from photos

Bentley[®]

Reality Mesh combining photos and point cloud

Supporting the supply chain

Helping teams to better meet the owner's required outcomes

Fail fast and forward

Shoot yourself in the foot . . .

before somebody else shoots you in the head

The BIM Academy will support the government construction strategy by increasing the use of BIM and creating a lasting legacy of best practice in innovation

> Andrew Wolstenholme Crossrail CEO

What is the purpose of the Academy?

- Educates, trains and supports
- Enhances supply chain knowledge
- Drives construction industry innovation in BIM
- Software and best practice
- Knowledge capture and transfer to other projects.

How does the Academy look?

What is the Academy achieving?

- Educating, training and supporting
- Fostering R&D
- Capturing two-way industry feedback
- Enhancing your BIMBOK[©]
- Benchmarking

www.bentley.com

Bentley[®]

Why have your own Academy?

Manage RISK

Educate your supply chainBrief them on your visionExplain their contractual obligationsHelp them understand why

Coach and train Show them how to use software and processes

Experiment and sandbox

Take advantage of new technology Assess the impact of new standards

In conclusion . . lessons learned

Don't just mandate BIM

Do be brave and prepared to shoot yourself in the foot

Beware <u>anyone</u> who tells you it's easy!

- Define what's needed
- Develop a plan to deliver it
- Ensure everyone is capable of delivering
- Produce the deliverables
- Manage the documents and data
- Ensure compliance

Best Practice BIM for Infrastructure
